Manual*

Police Blotter Incident User Manual

Background

In 2014, Council Person Natalia Rudiak sponsored legislation for “Open Data” providing the newly formed Open Pittsburgh group to pursue various data sets available from the city. The Pittsburgh Bureau of Police was already providing a weekly incident summary of daily incidents. These incidents do not include all police activity but do provide actively in each police zone. The reports were in PDF format that is good to view or print but requires programmatic processes to retrieve the imbedded information. A team of developers worked on the process gathering the data from the PDF and storing the data in a database. The team met with the Chief of Police and some senior staff and with a sample presentation we convinced to provide the incident data in a machine readable format. The csv (comma separated value) can be read by Excel or other spread sheet applications. Most of the team members moved on to other projects leaving one remaining to create the current environment.

Computer resources

The Police Blotter is hosted on AWS (Amazon Web Services). The Code for America (CfA) has an agreement with AWS and the Open Pittsburgh Brigade is utilizing these resources. There are two computer instances running, one a Linux Operating System server support the Apache Web Server. This provides the web pages you see. It also supports retrieving the csv from the city site and loading the data into a database. The process also uses a database server running PostgreSQL with GIS (Geographical Information System) data. The GIS is needed for storing and processing latitude (lat) and longitude (long) information. The mapping system is based on Google Maps. Using the Bootstrap java scripts technology allows presentations on desktop, iPad and smart phones. There is a problem with selecting points on smartphones at this time.

Police Blotter Incident User Manual

Main Page

The screenshot shows a web browser window titled "Police Blotter". The address bar contains the URL "web-pblotter-v1-elb-1058384347.us-west-2.elb.amazonaws.com/OpenPittsburgh/public_html/PPBI.php". Below the address bar, there's a message: "For quick access, place your bookmarks here on the bookmarks bar. Import bookmarks now...". The main content area is titled "Pittsburgh Police Blotter Index" and includes the text "Open Pittsburgh © 2016".

About the Police Blotter:

The @OpenPGH project reads the City of Pittsburgh Police Blotter daily report, reads the .csv file and loads the data into a PostgreSQL database. The address geo-coding is done using the Allegheny County Address Service. The Incident Data is loaded from a PostgreSQL backup running the address at and in. Since this is a daily process based on yesterday's data, you will not see any max data from midnight until 0300 when the job runs. If an error in processing has occurred there will be a delay, you should be able to see the data before 0600. The uploading of the json files depend on successful data processing and is manually run. You can also follow City of Pittsburgh Police Incident Data from the Western Pennsylvania Regional Data Center under Public Safety & Justice.

Maps

Pin

Open Blotter Button lists incidents from the previous day on a Google Map. Each pin represents an incident. The Red pins are Arrests and the Yellow pins are Offense 2.0 (Need to define these somewhere) You can select a neighborhood, police zone or council district and each will show the borders.

Police Blotter Incident User Manual

The screenshot shows a web browser window titled "Police Blotter". The main content is a map of Pittsburgh, Pennsylvania, with various locations marked by blue pins. A legend on the right side indicates that these pins represent "Arrests", "Offense 2.0", and "Police Stations". The map also shows major roads and landmarks. At the bottom of the page, there is a "Disclaimer" section with legal text and copyright information for Open Pittsburgh.

Address

Open Blotter Group by Address Button lists incidents from the previous day on a Google Map. The map will include any previous incidents at that address. The map includes a consolidation representation that highlights grouped incidents. Each pin represents an incident. The Red pins are incidents. You can select a neighborhood, police zone or council district and each will show the borders.

The screenshot shows a web browser window titled "Police Blotter XML Marker". The main content is a map of Pittsburgh, similar to the one above, but with incidents grouped by address. Large blue circles of varying sizes are placed on the map, indicating clusters of incidents. A legend on the right shows a red pin for "Multiple Police Stations". The map includes city boundaries for neighborhoods, police zones, and council districts. Like the first page, it features a "Disclaimer" section at the bottom.

Police Blotter Incident User Manual

Heat

The screenshot shows a web browser window titled "Police Blotter Heat Map". The URL is "web-pblotter-v1-elb-1058384347.us-west-2.elb.amazonaws.com/PPBQ/index.php". The page displays a "Police Blotter Heat Map Queries 1.3.2a" header with a note: "Note: The row count is a weighted value, not actual incident count. The weighted value will not display severity of actual incidents. Google Heat Map has an array limit, so you might not see results. © Open Pittsburgh 2016". Below the header are four filter sections: "Calendar" (with start date "03/10/2015" and end date "04/09/2016"), "Council District" (with selection "1 Darlene Harris" and "Submit" button), "Neighborhood" (with selection "Allegheny Center" and "Submit" button), and "Police Zone" (with selection "Zone 1" and "Submit" button). A "Next" button is located below the calendar section. At the bottom, there is an "Incident Descriptions" section with a dropdown menu showing "302 (Mental)" and a "Submit" button.

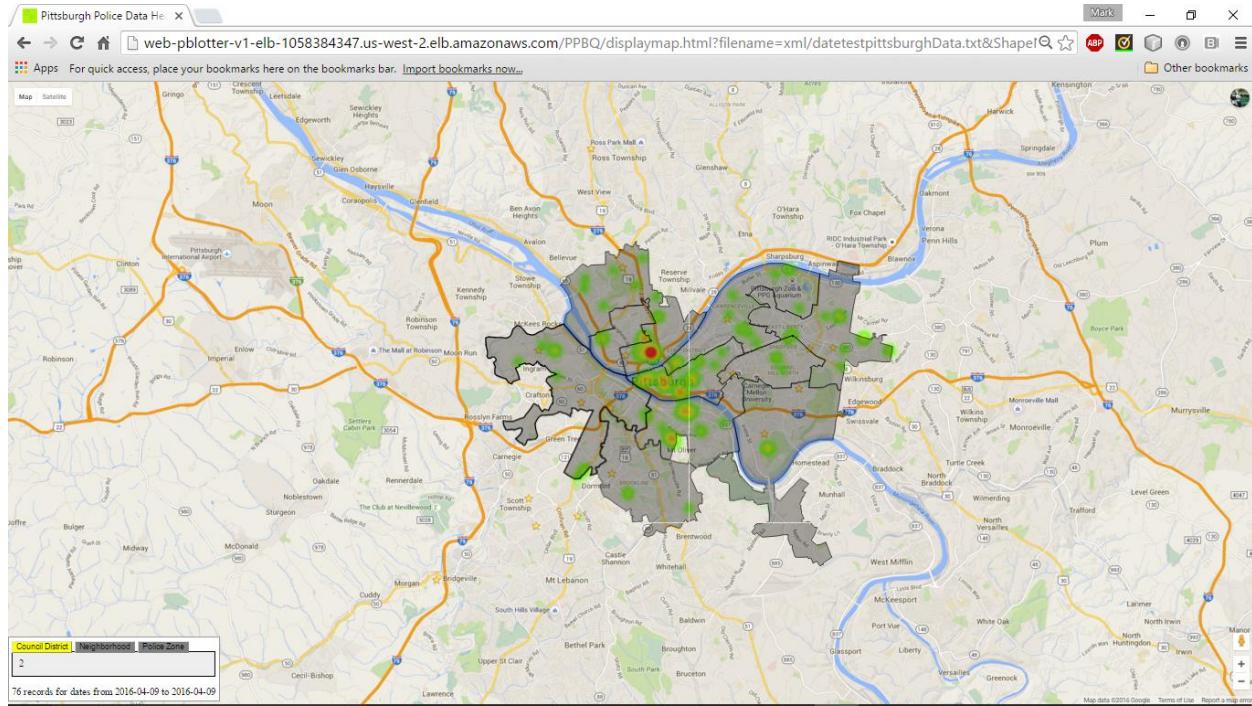

The Heat Map groups incidents and displays the results in different colors with the most intense activity in red.

The Heat Map includes five selectable options: Calendar, Council District, Neighborhood, Police Zone and Incident Descriptions.

The Calendar data range begins with the first available date through the previous day. Selecting this option with a large date range might result in no displayed data. Google Heat Map has a data limit that can be exceeded resulting in no data. The Heat Map has key information in the lower left corner with selection buttons for Council District, Neighborhood and Police Zone with an text description or number on the area the mouse has rolled over on the map.

Example:

Police Blotter Incident User Manual

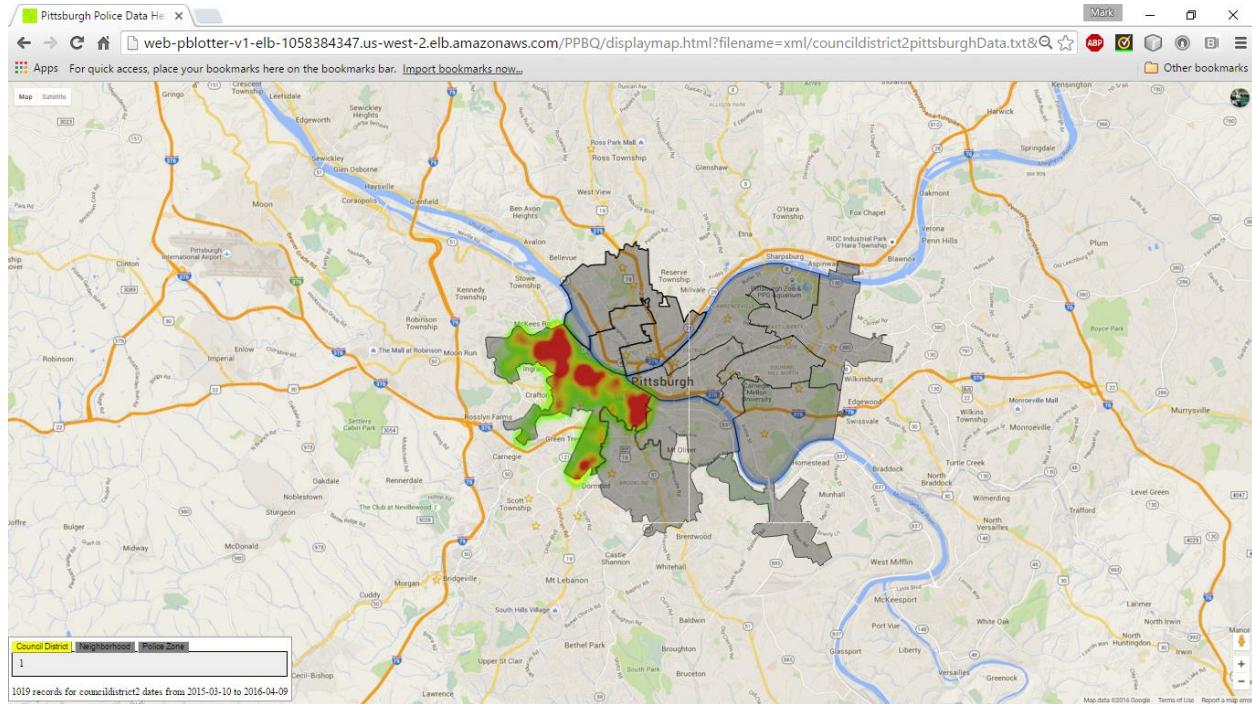

If you are selecting Council District, Neighborhood, Police Zone or Incident Descriptions you need to select a date range first.

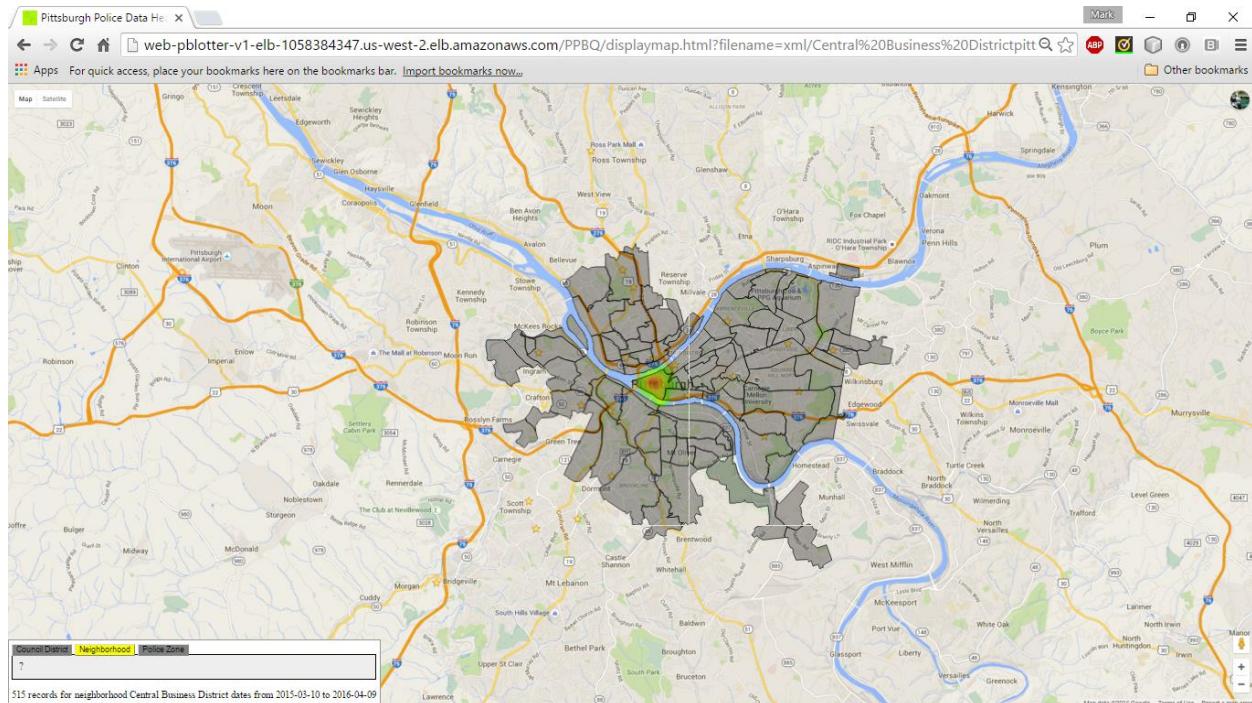

The Council District, Neighborhood and Police Zone will display a heat map for the date range and selection.

Council District 2 Example

Police Blotter Incident User Manual

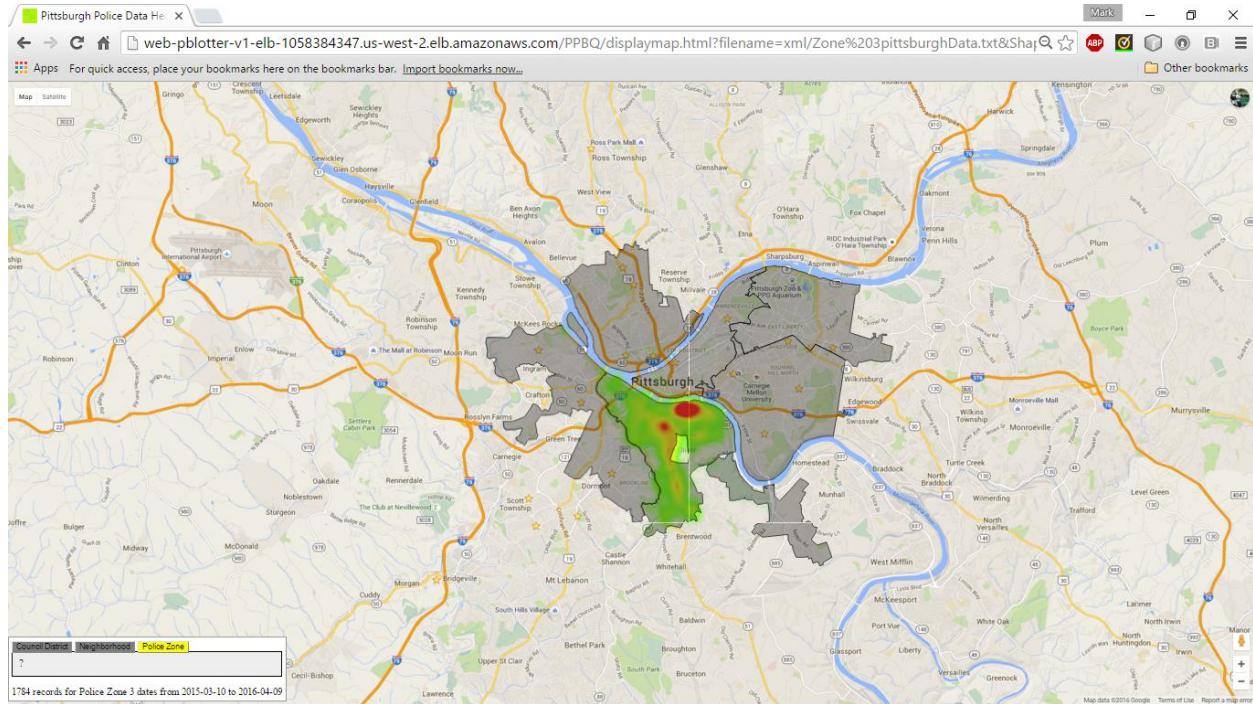

Neighborhood Example Using Central Business District

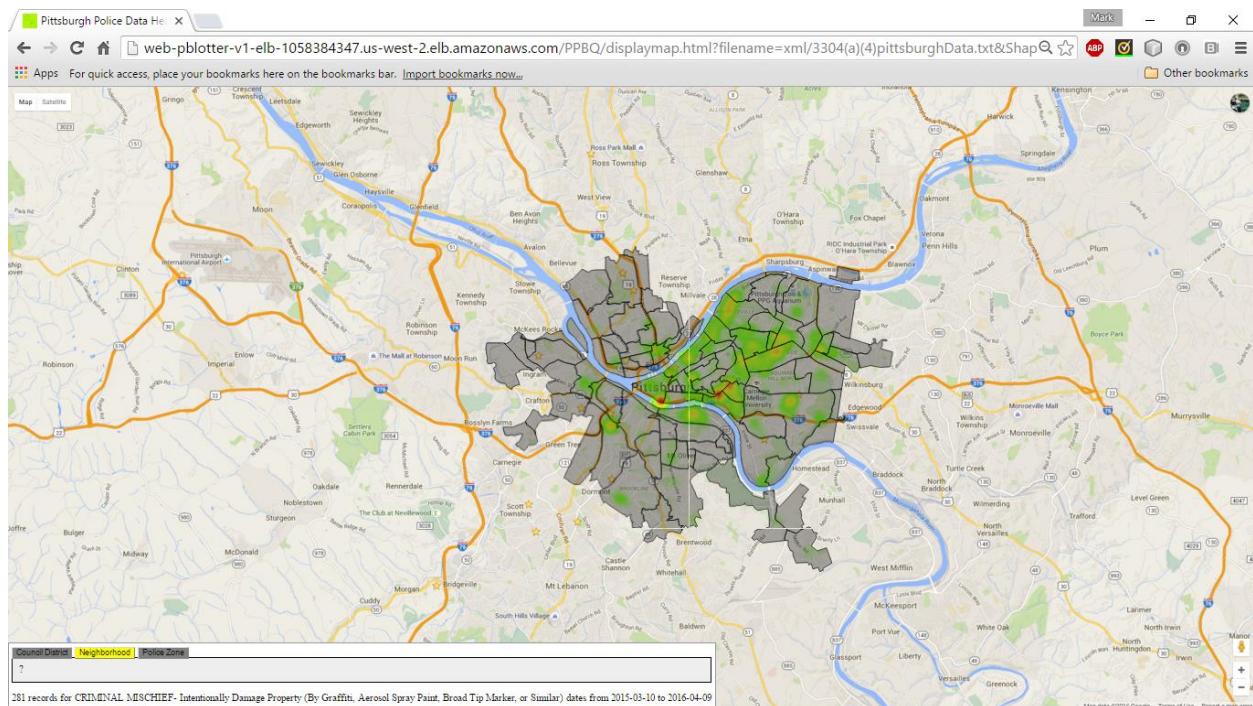

Police Zone Example Using Police Zone 3

Police Blotter Incident User Manual

The Incident Descriptions option includes all incident descriptions available.

Description Example:

Tables

Generic Query

The Generic Query allows to select a date range and either Council District, Neighborhood, Police Zone, Incident Descriptions or Address Entry. You can just select a calendar date range, click Next and View Details. The Address Entry field allows you to enter a street name. Don't include a house number or follow with Street, Road, etc. When you return to Table Query Page, you have to reset the date range. It returns to the default of the first and last available dates. Each of the reports can be sorted by clicking on the column heading. You will notice a color change when the data has been loaded.

The screenshot shows a web browser window titled "Police Blotter Table Query". The URL is "web-pblotter-v1-elb-1058384347.us-west-2.elb.amazonaws.com/PPBQ/GenericQuery.php". The page contains several search fields:

- Calendar:** Enter a start date on or after: 03/10/2015; Enter an ending date on or before: 04/09/2016. Buttons: Next, Submit.
- Council District:** You can select a Council District (1-9). Current selection: Dariene Harris. Buttons: Submit.
- Neighborhood:** You can select a Neighborhood. Current selection: Allegheny Center. Buttons: Submit.
- Police Zone:** You can select a Police Zone. Current selection: Zone 1. Buttons: Submit.
- Incident Descriptions:** Select a Description: 392 (Mental). Buttons: Submit.
- Address Entry:** Enter an Address: [empty input field]. Buttons: Submit.

File Download Query

The File Download Query allows to select a date range and either Council District, Neighborhood, Police Zone, Incident Descriptions or Address Entry. You can just select a calendar date range, click Next and View Details. The Address Entry field allows you to enter a street name. Don't include a house number

Police Blotter Incident User Manual

or follow with Street, Road, etc. When you return to Table Query Page, you have to reset the date range. It returns to the default of the first and last available dates. You can group selection by clicking the Add button for the selection you'd like and when ready click the Submit Button. The process will download a data.csv file to your local computer. You will see incremental file naming. You can use a spreadsheet program to open and view the file.

The screenshot shows a web browser window with the following details:

- Title Bar:** Police Blotter to file Selection Query | Open Pittsburgh – Pittsburgh, PA
- Address Bar:** web-pblotter-v1-elb-1058384347.us-west-2.elb.amazonaws.com/PPBQ/FileDownload/SelectionQuery.php
- Toolbar:** Back, Forward, Stop, Refresh, Home, Search, Favorites, Bookmarks, Apps, Import bookmarks now, Other bookmarks.
- Content Area:**
 - Police Blotter DB to File Selection Query:** Note: This is a query selection. Select your option and click the Add Button
After you've made your selections click the Submit Button
If you wish only one selection, pick your option and press Submit Button
The process creates a comma separated value (csv) file
 - Calendar:** Enter a start date on or after: 03/10/2015; Enter an ending date on or before: 04/09/2016; Next button.
 - Council District:** You can select a Council District (1-6). 1 Daniele Harris, Add, Submit buttons.
 - Neighborhood:** You can select a Neighborhood. Allegheny Center, Add, Submit buttons.
 - Police Zone:** You can select a Police Zone. Zone 1, Add, Submit buttons.
 - Incident Descriptions:** Select a Description: 302 (Mental), Add, Submit buttons.
 - Address Entry:** Enter an Address: [empty field], Add, Submit buttons.

This grouping was all available dates, for Crafton Heights Neighborhood and Aggravated Assault

Police Blotter Incident User Manual

The screenshot shows a Microsoft Excel spreadsheet titled "data (8) - Microsoft Excel". The table has 19 columns labeled A through P. Column A is the primary key, and column B is the secondary key. The columns represent various incident details such as date, time, location, and description. The data spans from row 1 to row 21. The table is styled with a light gray background and black borders for each cell.

Selection Query

The Selection Query allows to select a date range and either Council District, Neighborhood, Police Zone, Incident Descriptions or Address Entry. You can just select a calendar date range, click Next and View Details. The Address Entry field allows you to enter a street name. Don't include a house number or follow with Street, Road, etc. When you return to Table Query Page, you have to reset the date range. It returns to the default of the first and last available dates. You can group selection by clicking the Add button for the selection you'd like and when ready click the Submit Button. The process will display sortable table results.

Disclaimer

The Pittsburgh Bureau of Police csv file is processed every morning at 0300 for the previous day of the city's police incidents. The display is limited to the accuracy of the contents and the number of incidents provided by the police and might not include all incidents for the day. It is important that any decisions based on this data be confirmed using additional resources. As the city says, "The City of Pittsburgh has provided this information as a service. The City assumes no responsibility for the use of information posted on this site." Mark Howe and Sunil Mogadati are the current team. Tim Condello, Mark Howe, Andrew McGill, Andy Somerville are the Original Open Pittsburgh Project Team Members.

City Disclaimer

Addresses are reported at the level of the 100 block. All juvenile demographic data is removed.

References to sex crimes are not currently included to protect the identity of victims. (1) PA CC 18sec9101

Police Blotter Incident User Manual

"Police blotter." A chronological listing of arrests, usually documented contemporaneous with the incident, which may include, but is not limited to, the name and address of the individual charged and the alleged offenses. As the limiting factor as to what is and what is not blotter information is best defined by what information is or reasonably could be investigative data. [that reasonably should be withheld in the best interest of current or future investigations and prosecution][information that contains personally identifiable information]. "Investigative information." Information assembled as a result of the performance of any inquiry, formal or informal, into a criminal incident or an allegation of criminal wrongdoing and may include modus operandi information.
